

# RUDE, MEAN, BULLYING PRE-TEST

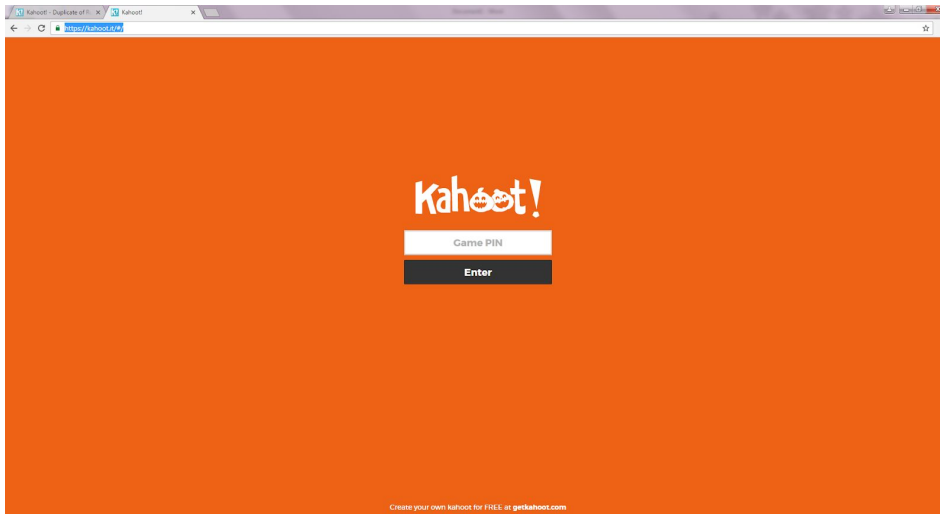

## KAHOOT DIRECTIONS

### **BEFORE CLASS**

Make sure each student has his/her own computer or device connected to the internet. This will work on phones and tablets too, so a laptop is not necessary.

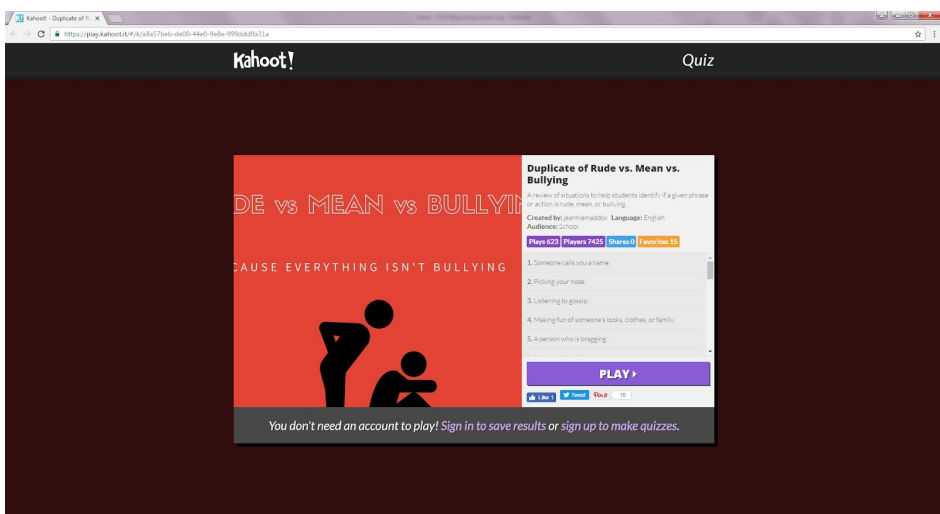

Make sure they are logged in and set to the following web address: <https://kahoot.it/#/>

The screen will look like:

On your computer (connected to your board or projector), please go to the following website:

<https://play.kahoot.it> Search Rude vs. Mean vs. Bullying. You're looking for one that looks like the picture below and contains 25 questions. Make sure you play it first because sometimes people make copies and change them for older or younger audiences and you may not like their questions.

Click **“sign in to save results”** at the bottom of the screen

Sign in to your account to save the results so you can track growth between pre and post test.

# RUDE, MEAN, BULLYING PRE-TEST

## KAHOOT DIRECTIONS

Then click the purple **play** button

Then click the purple **start now** button

Choose "Classic" version of playing. Player vs player 1:1 devices

### WHEN CLASS STARTS

Please explain that they are playing a game and taking a pre-test all at the same time. Tell them they will be learning about what is rude, mean, or bullying over the next couple of months and that no one expects them to know the answers....yet.... 😊

Just have fun and play along!

### THEN

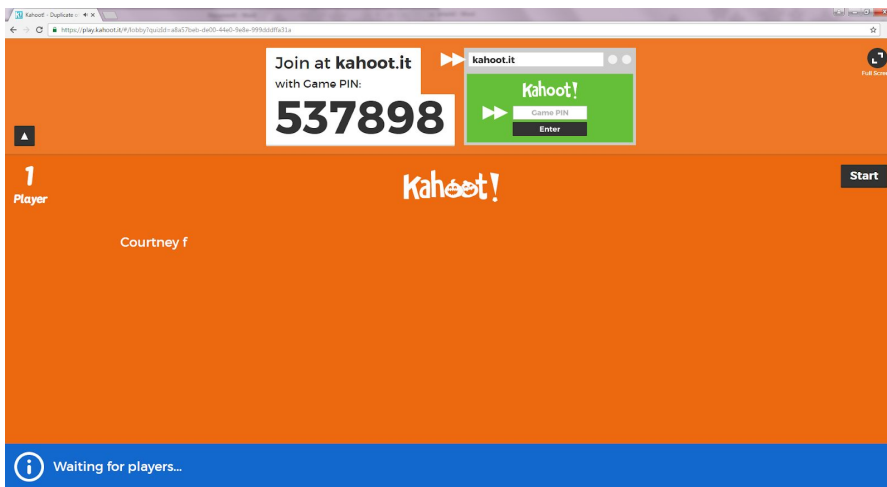

Each student enters the game PIN on his/her device.

Each game PIN is unique to the group playing, so you won't overlap with each other.

Each student will need to create a nickname. **Please have them enter First Name, Last Initial**

As they do this, players (by nickname) will appear on your screen/board.

That looks like this:

Once everyone is signed in, click **start** to get to the first question

They will get 20 seconds to answer each question by choosing if it is:

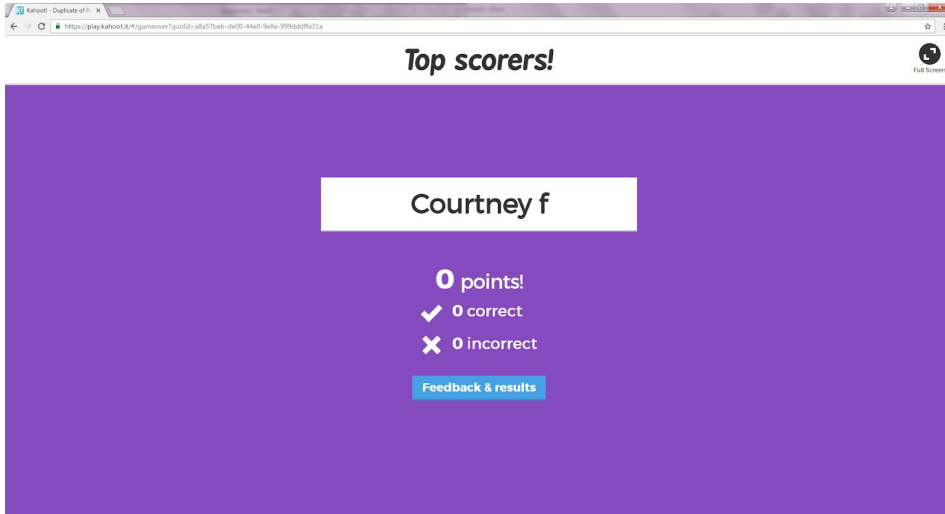

- Rude
- Mean
- Bullying

It is 25 questions long and will likely take 30-35 minutes to complete.

## WHEN YOU ARE FINISHED

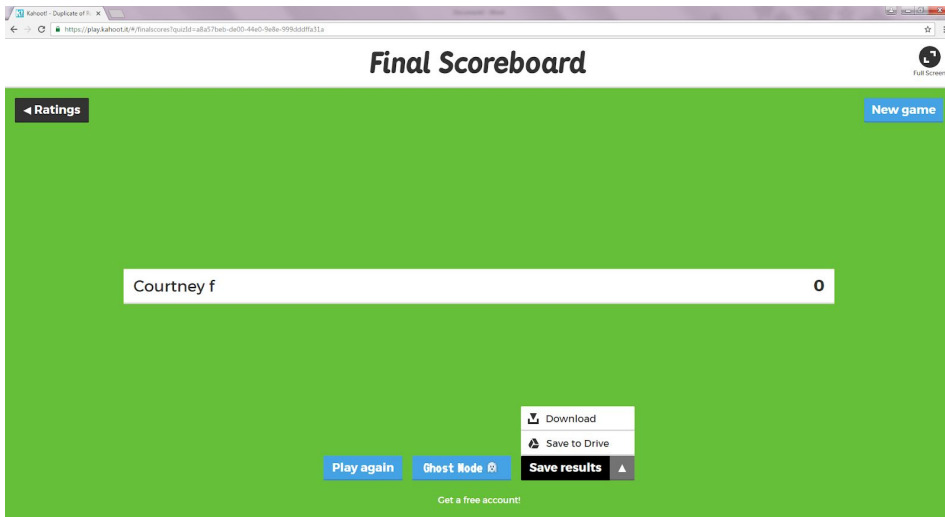

You will have a screen that looks like this:

Click on **feedback and results**

And then on **Final Results** in the upper right hand corner

That takes you here:

Click on **download**. **IT SHOULD SAVE TO YOUR ACCOUNT AUTOMATICALLY**, but if it doesn't, you don't want to lose the data.
